

Bellanina Collagen Blanket

Features and Benefits

If you have a client who wants instant results of smooth, soft and “plumped” skin, the Collagen Blanket treatment is a good recommendation. For special occasions, this treatment, as an add-on to the Belaví Facelift Massage, does wonders and we often recommend it as a “quick fix” for weddings, or special occasions when the client wants to look her absolute best. A sheet of freeze dried collagen is placed on the face with hot paraffin wax to create a mask. Heat from the paraffin pushes the collagen deep into the skin to plump the skin and diminish lines, offering amazing, quick results for a special occasion. This treatment is sold as an add-on to a Facial or Bellanina Facelift Massage. Perform during the hand and foot massage portion of the Facial or the Bellanina Facelift Massage.

The Treatment

1. **CLEANSE**— Lay collagen blanket on face that has been cleansed.
2. With wet facial wipes or sponges or a wet fan brush (warm water), brush or dab the collagen onto the face with strokes from medial to lateral, pulling the mask down along the jaw line. You may cut the corners to allow more collagen to “patch” onto the jaw area.
3. **PARAFFIN**— Dip facial gauze in paraffin. After you’ve let it drip, lay over the face and press, this will make a hard mask. Be sure that there is sufficient air passage for breathing. Do not allow paraffin to come in contact with the eyes. Repeat so that you have 3 layers of paraffin in total. Lay a cool eye pad over eyes.
4. Leave on for 20 minutes.
5. Remove by pulling the hard mask off first, then pull the collagen blanket off, lay it flat on wax paper, spray with Azulene Toner and roll it up with wax paper and place back into plastic sleeve for client to take home and place in their refrigerator.
6. **MOISTURIZE**— Make sure there is no excess paraffin left on skin, apply moisturizer and sunscreen.
